

control

KeyBox Keycontrol. Intelligent key cabinets.

Your Keycontrol system can include everything from a few up to several thousand keys. In step with your growing needs, you can easily add more strips and key places to your cabinet, or add more cabinets to the same system. Up to one hundred cabinets can be used in the same system.

The key cabinet has a display with a simple menu and search function. The cabinets are equipped with battery backup, alarm and 14 key places on each strip.

KEYWIN5

The KeyWin5 PC program keeps track of each separate key via the IntelliPin key peg. Pair the IntelliPin and key together, then place them on the strip on the wall or in a cabinet. Each separate IntelliPin carries a unique ID, which means you can easily identify the status of individual keys directly from KeyWin5. Also available as a web application
